Cyber Security graduate with over three years of experience in software development, software testing, and IT operations. Completed a vulnerability management internship performing network and web application security assessments, CVE analysis, and remediation reporting. Experienced in enterprise IT support, infrastructure monitoring, and incident management. Passionate about building secure, resilient, and scalable technology solutions.

SKILLS

- **Core Competencies:** Cybersecurity fundamentals, vulnerability management, CVE Analysis, security risk assessment, network security fundamentals, incident analysis and troubleshooting, infrastructure and system support, IT service management, technical documentation, reporting, stakeholder communication, problem solving and analytical thinking, team collaboration
- **Security Tools and Compliance**: Greenbone vulnerability management, web security testing, network traffic analysis, authentication security (JWT), CVE analysis, ISO 27001 awareness, risk assessment and reporting, Burp Suite, Wireshark, John the Ripper, RainbowCrack, COBIT awareness, security compliance principles, threat analysis
- **Operating Systems & Platforms:** Windows 10 and 11, Linux, networking fundamentals, TCP IP and DNS
- **Cloud and Microsoft Technologies:** Microsoft 365 fundamentals, Outlook, Teams, SharePoint fundamentals, Azure fundamentals
- **Monitoring and ITSM Tools:** BMC Helix, Dynatrace, LogicMonitor, ITIL aligned ticketing and incident management processes, JIRA, Azure DevOps, GitHub
- **Development and Web Technologies:** HTML, CSS, JavaScript, JWT Authentication Concepts
- **Programming and Scripting:** Python, R, Java, SQL

PROFESSIONAL EXPERIENCE

Vulnerability Management Intern **04 April 2025 - 30 June 2025**
Xspectre Cybersecurity

- Conducted end-to-end vulnerability management using Greenbone Vulnerability Management (GVM), including network and web application scanning, CVE analysis, risk prioritization, and remediation tracking.
- Diagnosed and resolved a critical Linux command compatibility issue introduced after a system upgrade, which had impacted multiple vulnerability scanners for over 3 months.
- Produced detailed CVE-based risk assessment reports with prioritized mitigation recommendations
- Monitored and analyzed security logs using SIEM methodologies, aligning vulnerability assessments with ISO 27001 and NIST frameworks to support compliance and risk reduction.

System Engineer **15 July 2019 - 09 Dec 2022**
Tata Consultancy Services (TCS)

- Managed L1 to L3 support across enterprise retail environments
- Automated incident workflows in BMC Helix, increasing team productivity and reducing overall incident volume by 40%.
- Trained new employees and developed comprehensive learning materials, improving onboarding efficiency and reducing training time.
- Created detailed access management documentation, enabling smoother access audits and reducing audit discrepancies.
- Led the NaaS migration across 600+ retail stores, providing end-to-end support that lowered operational costs and ensured a seamless transition.
- Authored and maintained 50+ SOPs and knowledge-base articles, reducing repeat issues by 20% and improving enquiry resolution efficiency.
- Travel & Tourism Domain (Developer - Adaptris): Developed and implemented solutions for seamless data exchange between travel systems like airline reservations and hotel bookings.
- Retail Domain (Software Tester): Ensured quality and functionality of retail applications (POS, inventory, e-commerce) through test planning and execution.

PROJECTS

Homomorphic Encryption (HE) for Biometric Template Protection, Team Member, RMIT, Australia:

- Conducted an in-depth analysis of homomorphic encryption algorithms for securing biometric data.
- Assessed privacy and security compliance in alignment with ISO/IEC 24745 standards.
- Highlighted significant computational overhead as a limitation for real-time HE implementation.
- Suggested a hybrid approach integrating cancelable biometrics with HE to improve security.
- Concluded that while HE demonstrates strong potential for biometric template protection, further optimization is necessary.

CERTIFICATIONS

- Cybersecurity Job Simulation - New York Jobs CEO Council
- Cybersecurity Job Simulation - Datacom
- Introduction to Cybersecurity Job Simulation - Commonwealth Bank
- Cybersecurity Roles, Processes & Operating System by IBM
- Technical Support Engineer Support by Mangtas
- Actively completing hands-on cybersecurity labs on TryHackMe, focusing on penetration testing, Linux exploitation, network analysis, and real-world attack simulations

EDUCATION

Royal Melbourne Institute of Technology **Aug 2023 - June 2025**
Masters in Cyber Security

Kristu Jyoti College of Management & Technology **Aug 2016 - May 2019**
Master of Computer Application

Kristu Jyoti College of Management & Technology **Aug 2013 - April 2016**
Bachelors of Computer Application

AWARDS & RECOGNITION

- 3 On the Spot Awards from TCS
- Best Team Award from TCS
- Outstanding Achievement in Customer Satisfaction
